

EURASIA

Eurasia is a region that is made up of some countries in Europe and some countries in Asia. Not many people there know about Jesus. Our CMS missionaries in Eurasia love spending time with people in their community. They are learning language and culture to help them tell others about God's great love.

ACTIVITY

Because Eurasia covers such a vast expanse of land, Winters can get very cold and Summers can get very hot. This picture shows the same city in different seasons. Can you colour it in using cool colours for Winter and warm colours for Summer?

Did you know?

Some geographers say Eurasia is one big continent because Europe and Asia sit mostly on the same tectonic plate and there is no sea dividing them.

Fun fact:

The Ural Mountains in Russia separate Europe from Asia.

BIBLE CHALLENGE

What did Jesus describe himself as, to help people understand how much he loved them? Discover what Jesus said in John 10:14 by completing this puzzle. Start in the orange square and then follow the arrows, writing down the letters in order on the lines provided.
